

MAINTENANCE

The Public Works department has been monitoring street lights for damages and outages and has been responding to citizen’s complaints in this regard. The decorative street lights in Columbia Crescent are the responsibility of the Village to maintain. Some repairs were required this year to a few light standards. Spare parts are currently in stock.

Complaints of damage and outages of BC Hydro street lights are reported by the Public Works Office, which are then entered into the BC Hydro Street Light Information Management Program (SLIM). It is then up to BC Hydro to schedule and execute the repairs. Please see the table below for all complaints logged.

In addition to this list, there was one light out at 6th Street and 9th Avenue that was not indicated on the SLIM program. The Director of Operations spoke directly with the local BC Hydro representatives in order to have this lamp serviced.
