

Public Notice Announcement

The Province has declared a Level 4 Drought level throughout the Kootenays and the Interior. Both surface and groundwater resources are depleted during a prolonged drought. Accordingly, the Village of Nakusp has moved to the most restrictive stage of water use which prohibits all non-essential irrigation and watering.

Residents must implement Mindful Water Conserving practices and follow the restrictions to conserve reservoirs.

This will maintain water resources for emergency purposes during these dynamic times.

Mindful Water Conserving Examples

Hand Watering Vegetable Gardens

Drip Hose in Vegetable Gardens
